PRESS RELEASE
NEW PLANT INAUGURATION
DISA INDIA LIMITED, TUMKUR, KARNATAKA
12th November 2026

Norican inaugurates new state-of-the-art manufacturing facility in Tumkur, Karnataka

Greenfield expansion adds over 8,000 sq. metres to Norican's existing Tumkur operations, strengthening manufacturing capacity to support growing customer demand in India and across its global network.

Bengaluru, Karnataka | November 12, 2026: DISA India Limited, part of Norican, the global industrial technology group headquartered in Copenhagen, Denmark, today inaugurated its new manufacturing facility in Tumkur, Karnataka. The greenfield expansion marks another significant milestone in Norican's growth journey in India and reinforces the country's growing importance within its global manufacturing network.

For more than four decades, DISA India Limited has been serving customers with advanced foundry and surface treatment solutions. Over the years, its Tumkur operations have evolved into an important global manufacturing and engineering hub, serving customers across India and supporting Norican's worldwide operations.

The latest expansion, adding over 8,000 sq. metres of manufacturing space alongside the existing facility, significantly enhances Norican's manufacturing footprint and capabilities in India.

The inauguration ceremony was attended by Ulla Hartvig Tønnesen, President & CEO of Norican, and Peter Winther Schmidt, Consul General – Head of Trade & Innovation, Embassy of Denmark in India, along with members of the Board of Directors of DISA India Limited, customers, employees and business partners.

Strengthening India's role in Norican's global manufacturing network

The new state-of-the-art facility is a key part of Norican's continued investment and expansion in India. It will manufacture equipment and solutions across all four of Norican's technology brands – DISA, Wheelabrator, Simpson and StrikoWestofen – serving both domestic and international markets.

By bringing these capabilities together at Tumkur, Norican aims to strengthen local manufacturing capabilities, enhance operational efficiencies and improve responsiveness to customers. The expansion will also reinforce India's contribution to Norican's global supply network, while creating opportunities for further growth and development.

Speaking on the occasion, **Ulla Hartvig Tønnesen, President & CEO of Norican, said:**

“India is a strategically important market and a key growth region for Norican. The inauguration of this new manufacturing facility reinforces our long-term commitment to India and reflects our confidence in the country's manufacturing potential.

Through continued investments in technology, innovation, manufacturing excellence and sustainable growth, we aim to further strengthen our ability to support customers in India and globally. This investment also creates exciting opportunities for our employees and the wider manufacturing ecosystem.”

Lokesh Saxena, Managing Director & CEO, DISA India Limited, added:

“The inauguration of this new facility is an important milestone in our journey and reflects our confidence in the future of Indian manufacturing. It demonstrates our commitment to investing in India and strengthening Tumkur's position as an integral part of Norican's global manufacturing network.

The additional capacity and enhanced capabilities will provide us with greater flexibility to respond to evolving customer requirements, support our growth ambitions and serve markets

across the world. Equally important, this expansion creates new opportunities for our people, strengthens our local ecosystem and positions us well for the next phase of growth."
